# **Work Experience**

iD Tech Camps, Waltham, MA June – August 2014

Instructor

 Instructed programming courses for 13 to 17-year-olds. Taught students game programming for iOS in Unity, and how to create mods for Minecraft with Java.

MCD Partners, Fairport, NY June – August 2015

Developer Intern

- Assigned front-end development tasks for internal company and external client projects.

### **Projects**

#### Bloxeo – Multiuser Web Application September 2015 – Present

- Created with React.js and SCSS.
- Worked as part of the Client Team to create a collaborative brainstorming app where users generate, combine, and vote on ideas.

### PicMe – Multiuser Web Application April – May 2015

- Created with Node.js, MongoDB, and Jade following the MVC architectural pattern.
- Users register and login to a scrolling news feed of images posted by themselves and other users. Users have the ability to search for other users and visit their personal home pages.

### Map My Product – Web App Mashup November 2014

- Created a product locator that combines the Best Buy Product, Best Buy Stores, and Google Maps APIs.
- Users type in the name of a product to locate Best Buy stores near their location that currently have the product in stock.
